Office Action Summary	Application No. 10/827,139	Applicant(s) BENJAMIN ET AL.	
	Examiner Laura E. Martin	Art Unit 2853	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The restriction of 10/02/06 is hereby withdrawn in favor of the new restriction requirement herein below.

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

Species I, hereby drawn to a first fire line, a second fire line, a first address generator, a second address generator, a first drop generator, and a second drop generator (for example, as presently disclosed in claims 1-25);

Species II, hereby drawn to a first fire line, a second fire line, a first address generator, a second address generator, and fluid ejectors (for example, as presently disclosed in claims 26-34);

Species III, hereby drawn to a first address generator, a second address generator, first resistors, second resistors, a first address line, a second address line, the first resistors being located in a first section and the second resistors being located in a second section of the fluid ejection device (for example, as presently disclosed in claims 39-47);

Species IV: hereby drawn to a first fire line, a first address generator, a second address generator, a first drop generator, a second drop generator, data lines, and a first fluid feed source (for example, as presently disclosed in claims 48 and 50);

Species V: hereby drawn to a first fire line, a first address generator, a first drop generator, a second drop generator, data lines, and a fluid feed source (for example, as presently disclosed in claim 49);

Species VI: hereby drawn to a first fire line, a first address generator, a first drop generator, and a latch (for example, as presently disclosed in claims 51 and 52);

The species are independent or distinct because each species maintains distinct limitations which lead to a burdensome search.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 35, 36, and 38 are generic to species I and species III.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Laura E. Martin whose telephone number is (571) 272-2160. The examiner can normally be reached on Monday - Friday, 7:00 - 3:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen D. Meier can be reached on (571) 272-2149. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
